

Auto Service Report

Reason For Visit

Shop: Performance Tire & Auto
Date: 6/11/2025

The primary reason for the visit was to align the vehicle, potentially due to a steering wheel issue, pulling to one side while driving, or vibrations and unusual noises.

Repair Summary

The repairs mainly focused on ensuring the vehicle's steering and suspension systems function properly. Key components like control arms and ball joints were replaced, followed by a wheel alignment.

Major

Major

- ****Control Arms****: Two control arms were replaced. These are parts of the suspension system that help the wheels move up and down when driving over bumps, maintaining proper wheel alignment and handling.

- ****Ball Joints****: Two ball joints were replaced. These connect the steering knuckles to the control arms, allowing for smooth and controlled wheel movement.
- ****Wheel Alignment****: An alignment was performed to correct the angles of the wheels, ensuring they are set to the car maker's specifications. This helps the car drive straight, reduces tire wear, and improves fuel efficiency.

Minor

Minor

Cost Breakdown

- ****Courtesy Inspection****: A general inspection of the vehicle was conducted at no cost to check various components for any issues.
- ****Tire/Wheel Inspection****: A specific inspection focused on the tires and wheels was performed to assess their condition.

- Control Arms (2): \$306.30
- Ball Joints (2): \$260.26
- Alignment: \$119.21
- Mechanic Labor: \$942.14
- Environmental & Technology Fee: \$3.88
- Job Supplies: \$86.43
- Subtotal: \$1718.22
- Sales Tax: \$160.65
- Total Amount Due: \$1878.87

Your vehicle required significant attention to the steering and suspension systems. The control arms and ball joints, which had been worn out, were replaced. These components are essential for keeping your vehicle stable and safe to drive.

Ensuring proper alignment reduces the risk of uneven tire wear and ensures that your vehicle drives smoothly and straight, enhancing safety and comfort.

- Regularly monitor the alignment and condition of the tires, especially if you feel the steering wheel is off-center or the vehicle pulls to one side again.
- Schedule routine maintenance and inspections to keep your vehicle running smoothly and prevent future issues.
